

Graduate Solutions Engineer

Kogarah, New South Wales, Australia – Full-time

Our Commitment

At Climatech Zero, we're a growing team, daring to dream big. Our mission is simple.. to cool the planet & provide a better, more sustainable tomorrow. We partner with large corporations, helping them to achieve their carbon reduction targets.

We combine best-in-class engineering with cutting edge technologies to affect real and lasting change.

About the role

You will work with the Energy Solutions Team, as a technical & engineering resource, identifying energy and process optimisation solutions. You will be preparing energy assessment reports & assisting with the design, implementation and commissioning on energy conservation measures.

Highly flexible in day-to-day activities easily moving from design and engineering to site visits and field work. You will need to be proficient in a diverse skill set including energy modelling and analytics, report writing, technical specifications and customer engagement. You will need to interface with vendors and customers to develop unique solutions and solve technical problems.

Some travel within Australia may be required. Occasionally you might be required to travel overseas.

About the Solutions Team

Our solutions team is tasked with finding innovative solutions to meet our clients decarbonisation needs. At the core of our decarbonisation offerings are our energy performance contracts. The solutions team is responsible for identifying, designing, commissioning and tuning the unique and creative energy conservation solutions.

What we're looking for

Our people are what set us apart. We welcome and reward intellectual excellence, curiosity, and sophisticated thinking. We are looking for:

- Bachelor's degree in Engineering (mech, chem, process, etc), or related technical degree,
- Energy auditing or energy conservation project work experience – viewed favourably,
- Workplace experience in an industrial environment is a bonus

Who are you?

- Self-motivated with the ability to think ahead and drive initiatives without constant guidance
- Excellent written and verbal communication skills
- Ability to communicate complex / technical issues to non-technical audiences
- Ability to manage multiple deliverables simultaneously
- A natural curiosity and desire to learn

What you might be looking for

Our Culture & team is what sets us apart. We understand the importance of work life balance and want to work with our staff so they can perform at their best!

Some of the benefits to joining our team are:

- Flexible workplace: We offer flexibility for our staff to choose their own office. Work from home, from the office, or even from out of town when you're looking for a change of scenery;
- Flexible working hours: After 2 years in and out of lockdown, we've all developed some new routines - we offer the chance to vary when you work to better match your lifestyle
- Flexible leave: We offer flexibility with annual leave so you can recharge, give back, support others or focus on your own professional development;
- Physical well being: as part of the Climatech group, we offer access to a gym on site with classes that run at the end of every day.
- Professional development: We want to invest in you and your personal and professional growth, with a training budget to help you develop your skills..
- Open office layout promotes collaboration, conversation and teamwork to drive results with sit stand desks.
- Barista coffee machine available for staff
- Brand New Laptop and Mobile phone / phone service
